

## UNIQUE INDUSTRIAL PRODUCT COMPANY

Dear Customer,

We are pleased to inform you of our decision to sell our Fire Protection Division- 'Unique Fittings & Flanges (UFF)' unit to SIGMA Corporation, head quartered in Cream Ridge, New Jersey, effective March 1<sup>st</sup>, 2010.

As you are well aware, over the past 4 years, Unique Industrial Products has patiently developed a wide and growing range of quality products to serve the Fire Protection industry across the country.

With Sigma's network of strategically located distribution centers, we realized an opportunity to better service the customer with a regional sales team and Just-in-Time Inventory.

Over the last 25 years, SIGMA has grown into a leading supplier to the North American Waterworks Distributors. SIGMA has attained a sound reputation in the AWWA industry through their commitment to a wide range of quality products matched by strong customer relationships and relentless customer service.

To facilitate the transition and ensure continuity of our efficient service to you, Unique will continue to operate to process your orders just as we have thus far, from our Houston location, until March 31, 2010. During this time, the inventory will be gradually re-distributed to 7 of SIGMA's national facilities. So, until we advise you further, please continue to contact your usual UFF representative.

SIGMA will manage the Unique Fittings & Flanges business through a new subsidiary, '**SIGMA Piping Products**'. This new unit will be led by Matt Minamyer and Terry Clark who have over fifty years combined experience in the piping industry. Also, to ensure a smooth transition, Bill Vollmar and Ann Burritt will continue to be available to assist you in their current capacity at UFF.

We take this opportunity to thank you for your business all these years and look forward to your continued support.

Thank you,

**Jugal 'Jay' Malani**

**Pradeep Gupta**
